

# Christie Whitman & Bush lied --

## Toxic Air from 9/11 is killing us.

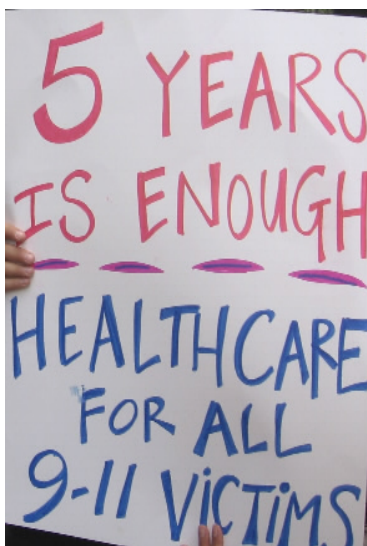

“I am glad to reassure the people of New York and Washington, D.C. that their air is safe to breath and their water is safe to drink.”

- Christie Todd Whitman, Bush appointed Head of the Environmental Protection Agency, September 13, 2001.

Many of us breathed the toxic air of 9-11. Now many of us are sick. We are Ground Zero workers and Lower Manhattan residents and workers seeking to hold the government accountable.

### *Join us to demand:*

- Long-term treatment & study for all those affected by the toxic air of 9/11.
- The government investigate the connections between our health problems and 9/11.
- Broadening Workers Comp eligibility to include all downtown workers.

### What Can I Do?

- Enroll in our 9/11 treatment program at Bellevue Hospital
- Participate in our petition drive
- Distribute information to other downtown workers and residents
- Strategize with us around the growing health needs caused by the 9/11 toxic air

For more information call the NMASS at (212) 358-0295 between 11am and 7pm or visit [www.beyondgroundzero.org](http://www.beyondgroundzero.org).
