_____, 2007

TO: The Congress of the United States of America

We, the residents and workers of Lower Manhattan, who have suffered the consequences of the toxic air of 9/11, are writing to you because we are sick and we are dying, and we need to know what is wrong with us. We are writing because the Federal government lied and told us the air was safe, and since then has continued to disregard our health and economic problems.

We demand the creation of a commission to conduct an independent investigation that:

a) Investigates the response of the Federal government to the 9-11 fallout to determine whether they lied, and whether its actions contributed to the failing health of workers and residents exposed to the toxic air; and
b) Determines the detrimental effects of the 9-11 fallout on the health of residents and workers of Lower Manhattan

Sincerely,

_____
