

BUSH AND WHITMAN SAY

YOU'RE NOT SICK!

and

YOU'RE LYING!

On June 25, 2007 in front of Congress, the former head of the EPA *Christine Todd Whitman* continued to lie about the government cover-up of the *9/11 toxic air*. While we get sicker every day, Bush and Whitman deny any responsibility, and continue to refuse to acknowledge that Lower Manhattan residents and workers and Ground Zero clean-up workers are sick.

We need to let Congress know the truth!

Join thousands of residents and workers who are sick after 9/11 in writing letters to tell Congress what's really happening to our health and to demand that they investigate Bush and Whitman's lies, so that we can push the government to finally respond to our health and economic needs.
